# DURESS ALLOCATOR PLUS+

The latest asset for your team

Allowing easy, fast and accurate broadcast of duress alerts using a touch screen or mouse environment. If you can press 2 buttons, you can send alerts to any number of staff to make them aware of any situation requiring their attention.

Duress situations are usually stressful and require accurate dispatch of information, **DuressAllocator PLUS+** makes this a simple, fast process ensuring a rapid response.

**DuressAllocator PLUS+** can be used with the BASEPage or Messenger family of software, Fusion and many other paging, SMS, DECT and messaging platforms.

The next time an urgent situation arises at your facility,

- How will the message be relayed to your staff?
- How accurate will the information be?
- How quickly will the message be broadcast?
- How do you know the message was sent?

**DuressAllocator PLUS+** has simple, pre-programmed messages as defined by you.

**DuressAllocator PLUS+** will transmit within 2-5 seconds from start to finish.

**DuressAllocator PLUS+** constantly checks for a connection to your transmission equipment and will confirm all transmissions on screen.

Screens can be customised to your requirements. Please enquire with our sales team for more information.
