CAREPLUS™ SMART CALL POINT

CarePlus™ Smart Call Points is a targeted, forward-thinking interface for significantly improved quality care coordination and management. This fosters safer environments in hospitals, aged care facilities, mental health facilities, drug and alcohol units, dementia units and day surgeries. The multifunctional Smart Call Points are scalable wall mount units with a large, braille push button for customised usage in various patient and staff stations. There are different colour and label options to provide diverse priorities and alarms for 100% accuracy in a superior design. All CarePlus™ Smart Call Points have antimicrobial protection and built-in infection control to reduce risk and spread of bacteria, infection and superbugs, such as MRSA. The IP system utilises the Smart Call Points for enhanced location data at reduced commissioning and operating costs.

Features & Main Benefits:

- Improved functionality and robust infrastructure.
- User-friendly for staff and patient satisfaction.
- Faster performance and better, more scalable integration.
- Economical installation.
- Accurate and traceable call initiation per resident per location.
- Large, easily identified push button with reassurance light and backlight.
- Plug and play configuration.
- Built-in infection control: anti-bacterial, anti-fungal coating with 99% biocidal kill rate.
- POE.
- 5 priorities per Smart Call Point.
- Up to 32,000 Smart Call Points per system.
- Incorporated auto-sensing clean mode.
- Jack socket peripherals.
- Complies with AS3811 hard-wired patient alarm systems.
