

2T8400 INDUSTRIAL TAG

Product Information Sheet

The Protrac iD series of Active Tags are powered by an internal lithium battery. The tag will for the duration of its life transmit a Radio Frequency (RF) signal at a pre-set time interval. The tag life is estimated up to 5 years at a transmission time interval of approximately 1.5 seconds.

The transmitted tag data includes Customer Site Code (CSC), Tag ID and Tag Age Counter Value. Protrac iD Industrial Tags are encapsulated in a moulded plastic case and epoxy resin filled for maximum protection.

The 2T8400 tag is generally used for harsh environments and heavy duty applications. The 2T8400 is suited for operating on metallic surfaces or plastics containing a high metal content.

Features

- Actively transmitting 24 x 7
- High Impact resistant UV stabilized PVC constructions
- Transmission largely unaffected by materials in the surrounding environment
- Easily fixed to all surfaces including metal and provided mounting holes
- Epoxy resin filled for maximum tag protection and robustness (IP67)
- Tags attached to road transport, rolling stock and cargo are monitored at up to 220kph
- Tags are read by fixed, mobile or hand held receivers
