INTEGRATED ACCESS
CONTROL PANEL

The newly designed and custom manufactured Integrated Access Control Panel, is state of the art in design and function. This panel is suitable for use with Integrated Security Systems and is durable vandal resistant and reliable.

The anodised brushed aluminium panel is constructed from 3mm aluminium plate for optimum strength and reliability and includes all engraving and punch outs ready for the nstallation of the access control associated equipment. The Integrated Access Control Panel includes cut outs for Intercom, Card Reader and MAS key barrel. It is noted that mounting arrangements may vary depending on actual installation location.

The Panel can be supplied as an individual panel or complete as a KIT with all components fully fitted ready for fit off, making installation quick and cost effective.

Variations or custom design available on request.
